asTech All In One

Introducing asTech All In One: Precision Meets Innovation in Every Repair

Introducing the asTech All In One the most comprehensive repair solution available to workshops. It's the only diagnostic tool you'll need in your workshop. The asTech All In One provides the capability to undertake both local and remote tasks in a single solution.

With a single VCI the workshop can access the powerful local software within the tablet to undertake the majority of tasks including vehicle diagnostics, scanning, calibrations and programming. However, in the event that a vehicle is not covered due to it being too new or having a Security Gateway then the user can access Repairify Remote Services. This means that by submitting a job via our App, a Repairify remote technician can pick up the request, chat with the carside technician and connect the vehicle over the air to the relevant OE tool within our datacentre.

The All In One truly is game changing, ensuring that you're correctly diagnosing, calibrating, or programming the vehicle with the right tool, and if necessary, with the latest OEM software.

asTech All In One

Key Features

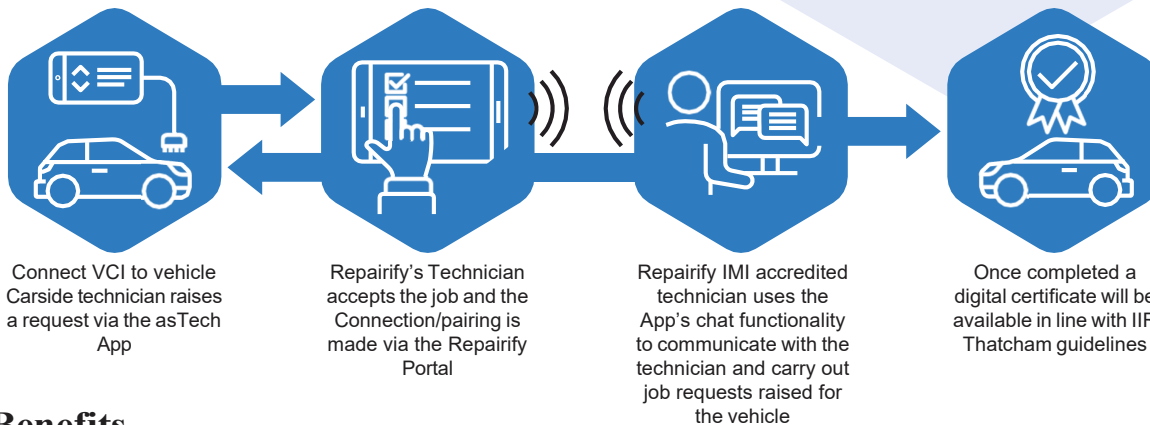

- ✓ The asTech All In One integrated tablet provides fast and reliable connectivity for enabling both local and remote work from a single device
- ✓ Local diagnostics including pre and post repair scans and DTC clearing
- ✓ Patented technology allows over the air connectivity with Repairify's Remote Services
- ✓ A large 10" screen and easy hold rugged case protects the tablet
- ✓ Simple touch screen technology enables access to all manufacturers and enables most work to be done locally at the car

- ✓ Upgrades available for Security Gateway Access on numerous manufacturers

Technical Features Include:

- ✓ Wiring diagrams for Engine management, ABS, ESP, A/C, SRS, doors, windows, exterior lighting, plus many more
- ✓ Component locations and information
- ✓ Ground point locations
- ✓ Battery disconnection/reconnection procedures
- ✓ High-voltage circuit deactivation procedures
- ✓ Highlights functionality to help trace wiring and component faults

Easy and Simple Step-by-Step

Benefits

- ✓ Use the right tool for the job and carry out most work locally
- ✓ Reduce key-to-key times by keeping jobs in your workshop
- ✓ Access secure gateways to complete complex repairs
- ✓ Supported by experienced, IMI trained technicians
- ✓ All remote work is covered by Repairify's insurance for peace of mind
- ✓ Ever expanding, extensive coverage
